

Global Data Center (GDC) Service Cancellation Request

The undersigned hereby gives thirty (30) days notification of intent to cancel services.

If aircraft ownership is retained, the undersigned agrees to reconfigure the datalink unit so that transmissions (such as position reports, OFF/ON reports, etc) are not sent to the GDC. Otherwise Subscriber shall continue to be responsible for charges incurred.

If GDC services are being cancelled due to the sale or transfer of the aircraft and the Subscriber wishes to retain the registration number for future use, it is the Subscriber's responsibility to have the datalink unit reconfigured prior to release of the aircraft.
